

## GATE VALVE - SVM-TG NPS/OD 28-48

**AREA OF USE:** Sewer and stormwater, process water and for the fishing and agricultural industry. SVM-TG is for one-sided pressure.

### ADVANTAGES WITH WAGATE SVM-TG:

- Can be connected to the pipeline network with coupling, electric coupling, flanges, or welded together in open terrain
- Is designed with full flow and with a self-cleaning pocket, which ensures total closure of the valve blade
- Long lifespan. Low operating and maintenance cost
- The O-ring seal against the valve blade can be replaced in larger valves
- Can be built into the pipeline inside and outside well systems with spindle extensions and protective tubes in PEH
- The valve is suitable for installation in the ground without any form of protection

**OPERATION:** SVM-TG has a non-rising spindle and is operated with a handwheel or with an adapter and extension rod.

Can be used with electric, pneumatic, or hydraulic actuators.

**SPECIAL DESIGN:** For aggressive media, the spindle/hut is mounted outside the valve body.
