

ENVIRONMENTAL POLICY

WAPRO'S COMMITMENT IS TO:

- protect the environment by minimising the risk of pollution and reducing the carbon footprint of our operations by systematically integrating environmental management into our processes
- strive to develop and improve products that help protect people, property and the environment, and that can contribute to sustainable solutions within aquaculture
- be a role model by setting requirements and communicating our environmental work both upstream and downstream in the value chain that we are part of
- increase employees' knowledge and sense of responsibility about environmental impacts and what is required of us to fulfil the Paris Agreement
- comply with national and European environmental legislation, and other relevant requirements related to environment and sustainability
- maintain and continuously improve our environmental management system and fulfil its requirements to the best of our ability to maintain a high environmental performance

HOLDING BACK THE FLOOD
